

120Hz quantum dot mini-LED backlit 21:9 displays

Pana X Premium 21:9 5K Displays

- 21:9 10 bit panel with 5120 x 2160 (5K) resolution
- 120 Hz refresh rate - smooth scrolling
- Premium Touch and Non-Touch options
- Mini-LED backlight with over 2000 dim zones
- Quantum Dots enable superior DCI-P3/Rec.2020 specs
- Over 2000 nits peak luminance with true black
- VESA DisplayHDR1400/1000 certifications (pending)
- ADA-compliant low profile when wall mounted

Experience the Premium 21:9 LCD line

Pana X models comprise a range of sizes in thin-profile touch or non-touch 120Hz 5K LCDs with quantum dot Mini-LED back-light and Jupiter's exclusive dual brightness enhancement technology, each with optically bonded, tempered, anti-glare edge to edge glass, identical frame-less design, identical back cover, identical display thickness, and identical port arrays across the entire line up. More sizes to come.

Our custom-engineered quantum-dot Mini-LED back-light offers more than 2,000 dim zones with proprietary algorithm in addition to over 2,000 nits of peak luminance. The architecture was so complex that we had to design a dedicated driver board from the ground up. Pana X delivers visual quality that challenges high-end home TVs.

Pana X Premium line features

Ultra high peak luminance and true blacks

Experience ultra bright visuals fit for any indoor environment without the need for ambient light control.

5K at 120Hz

Butter-smooth scrolling graphics meet 5K razor sharp visuals. An unprecedented combination that forced us to develop a proprietary image processor and the first Jupiter PC Module accessory with discrete Nvidia Graphics.

State of the Art Interactive User Experience

Our new flagship Pana 105XT model and Pana 81XT both utilizes the latest metal-mesh capacitive touch bundled with a 3mm-tip Pen for precision writing.

Fully Secure Display

Pana displays do not carry an embedded (or hidden) operating system, such as Android. An on-board computer or system to drive the 5K display is not required. We designed our Pana line to meet the most stringent and uncompromising secure user environments in government and defense.

As an added option, we offer powerful (and convenient) video processing systems: either a slot-in Jupiter designed and engineered on-board computer (on back of Pana X) that's capable to drive 120Hz on our 5K displays, or our compact CRS-5K processor that can splice up to 32 windows on a single Pana display while driving 5K, a Video Wall in a Box™.
